Certificate of Sanitization

Record of media sanitization for one device, based on NIST SP 800-88 Rev. 2 guidance

RECORD

Certificate number	PV-WIPE-000123
Customer	Example Company LLC
Request	Return of device from departing employee

DEVICE

Make / model	Dell Latitude 7450
Serial number / service tag	EXAMPLE1
Asset tag	EX-0042
Storage	512 GB NVMe SSD (self-encrypting)
Condition on arrival	Grade A, no visible damage, photos on file

SANITIZATION

Method category	Purge (NIST SP 800-88 Rev. 2)
Technique	Cryptographic erase via the drive’s sanitize command
Tool	Vendor or sanitization software, version recorded per job
Verification	Post-sanitize check passed, drive readable as blank
Result	PASSED
Started / completed	2026-01-15 10:02 / 10:09 ET

POST-SANITIZATION

Destination	Re-imaged and returned to customer stock (shelf B-14)
Device management	Removed from previous user, ready to re-enroll

PERFORMED AND VERIFIED BY

Technician	J. Sample
Verified by	A. Example
Facility	Provisio, Lakewood, NJ

A device that fails sanitization is quarantined and not returned to stock until it passes or is physically destroyed.

SAMPLE

Sample document for illustration. Names, serial numbers and dates are fictional. Real records are generated per device.
